

LOW CARBON HOMES - Free workshops

Government policy is for all new homes to be built to zero carbon by 2016 - a challenging target for designers, housing developers and house builders today. Does your business know how to limit the energy consumption and carbon emissions arising from the construction and operation of the homes you are developing?

You will be expected to achieve progressive improvement of the energy/carbon performance of your buildings: 25% by 2010 and 44% by 2013, so you need to be changing the way you build now.

SECBE is running a series of FREE events across the region to tell you how to find everything you need to know about low carbon design and build, including refurbishment and the Code for Sustainable Homes

Tuesday, 4 March 2008 (afternoon) – Brighton

Wednesday, 5 March 2008 (morning) – Oxford

Thursday, 6 March 2008 (morning) – Winchester

Tuesday, 11 March 2008 (afternoon) – Maidstone

Our 'hands-on' workshops will be facilitated by Sue Spilsbury, Principal Energy Consultant SAP & Code for Sustainable Homes Assessor, RPS Planning & Development. These workshops will provide sound preparation for the Brighton Conference.

Contact Tina McGeachan on 0118 9207 204 for more information or email Tina@secbe.org.uk to **reserve your place now.**
