

mk:50 training workshop

Conquering Site Waste Management Plans

Tuesday 27 November 2007

9.30am – 12.30pm

Clydesdale Bank, Tempus, 249 Midsummer Boulevard, Central Milton Keynes, MK9 1EA

Aim

This workshop has been designed to bring you up to speed on complying with legislation in time for April 2008 and how to make the most of this soon to be mandatory process.

Site Waste Management Plans

Site Waste Management Plans allow better waste management practices, help to reduce the amount of waste produced and identify best environmental disposal options. Implementing a Site Waste Management Plan (SWMP) can reduce costs (increasing business profits) and maximise resource efficiency.

Why would you need a Site Waste Management Plan?

The SWMP Code of Practice was launched on 8th July 2004 to help the construction industry face the major challenge of changes in waste management legislation. The DTI are now considering the introduction of mandatory SWMP as part of the Clean Neighbourhoods and Environment Act 2005 with regulations expected to be fully in force by April 2008.

What are benefits in attending this workshop?

- Improve your resource efficiency;
- decrease project costs;
- improve reuse and recycling rates;
- reduce site accidents;
- guarantee compliance with future legislation; and
- protect construction programme.

Cost

mk:50 club members: £100 (non-members: £200)

Book your place

Paying by cheque? Download and complete a hard copy of the booking form at www.mk50club.co.uk/training and return to us with your cheque. Full address details are on the form.
